

IMPORTANT NOTICE

INCREASED CONTINUING EDUCATION UNITS REQUIRED FOR LICENSE RENEWAL BEGINNING JULY 2017

The Respiratory Care Board has amended its continuing education (CE) regulations to increase the number of CE units required for license renewal. Beginning with licenses that expire on July 31, 2017, the number of CEs required for renewal will increase from 15 to 30.

The requirement that at least two-thirds of the CE units (now 20 of the required 30) be directly related to clinical practice has not changed, and completion of the Law and Professional Ethics Course will continue to count as three (3) non-clinical CE units.

All licensed RCPs should plan their CE activities to ensure compliance with the increased requirement as part of their next license renewal.
