California Code of Regulations Title 16. Professional and Vocational Regulations Division 13.6. Respiratory Care Board Article 6. Scope of Practice

1399.365. Basic Respiratory Tasks and Services.

- (a) For purposes of this section, "assessment" means making an analysis or judgment and making recommendations concerning the management, diagnosis, treatment, or care of a patient or as a means to perform any task in regard to the care of a patient. Assessment as used in this section is beyond documenting observations, and gathering and reporting data to a licensed respiratory care practitioner, registered nurse, or physician.
- (b) For purposes of subdivision (a) of section 3702.5 of the B&P, basic respiratory tasks and services do not require a respiratory assessment and include the following:
 - (1) Patient data collection.
 - (2) Application and monitoring of a pulse oximeter.
 - (3) Medication administration by aerosol that does not require manipulation of an invasive or non-invasive mechanical ventilator.
 - (4) Heat moisture exchanger (HME) and oxygen tank replacement for patients who are using non-invasive mechanical ventilation.
 - (5) Hygiene care including replacement of tracheostomy ties and gauze and cleaning of the stoma sites.
 - (6) Use of a manual resuscitation device and other cardio-pulmonary resuscitation technical skills (basic life support level) in the event of an emergency.
 - (7) Documentation of care provided, which includes data retrieved from performing a breath count or transcribing data from an invasive or non-invasive ventilator interface.
 - (8) Observing and gathering data from chest auscultation, palpation, and percussion.
- (c) For purposes of subdivision (a) of section 3702.5 of the B&P, basic respiratory tasks and services do not include the following:
 - (1) Manipulation of an invasive or non-invasive ventilator.
 - (2) Assessment or evaluation of observed and gathered data from chest auscultation, palpation, and percussion.
 - (3) Pre-treatment or post-treatment assessment.
 - (4) Use of medical gas mixtures other than oxygen.
 - (5) Preoxygenation, or endotracheal or nasal suctioning.
 - (6) Initial setup, change out, or replacement of a breathing circuit or adjustment of oxygen liter flow or oxygen concentration.
 - (7) Tracheal suctioning, cuff inflation/deflation, use or removal of an external speaking valve, or removal and replacement of the tracheostomy tube or inner cannula.
